
Magic Milk

Follow the instructions to make some 'magic milk'

1. Pour some milk into a small container
2. Add 4 drops of food colouring. Hint: a drop of different colours works best.
3. Dip a cotton bud into dishwashing liquid
4. Dip the cotton bud into the middle of the coloured drops
5. Watch what happens...

The dishwashing liquid binds to the fats in the milk. These parts of the milk then move away from the water based parts of the milk. This is what creates the patterns.
