

Night Program - Glow in the dark

Who doesn't love things that glow in the dark!

Program

Why not try glow bowling!

All you need are medium bottles (600mls) filled with water and with activated glow sticks inside. Line them up and bowl a ball to see who can knock them down!

Why not go night spotting to see if you can find nocturnal (only come out at night) animals?

Did you know spiders glow in the torchlight?

Remember you have to be very quiet and not just wave around your torch!

Use some glow in the dark paint to paint some penne pasta and thread onto wool to make a headband or necklace (make sure it is dry!).

Play a game of spotlight!

It will make it much trickier!!!

Why not try...

Invisible ink!

Use lemon juice in a bowl and with a very thin paintbrush write a message or draw a picture clue. It then needs to be heated gently to show the message!

Why not make glowing ice cubes?
Or glowing slime!

Check out these ideas here:
